

AnyLogic Professional License activation instructions

Dear Customer,

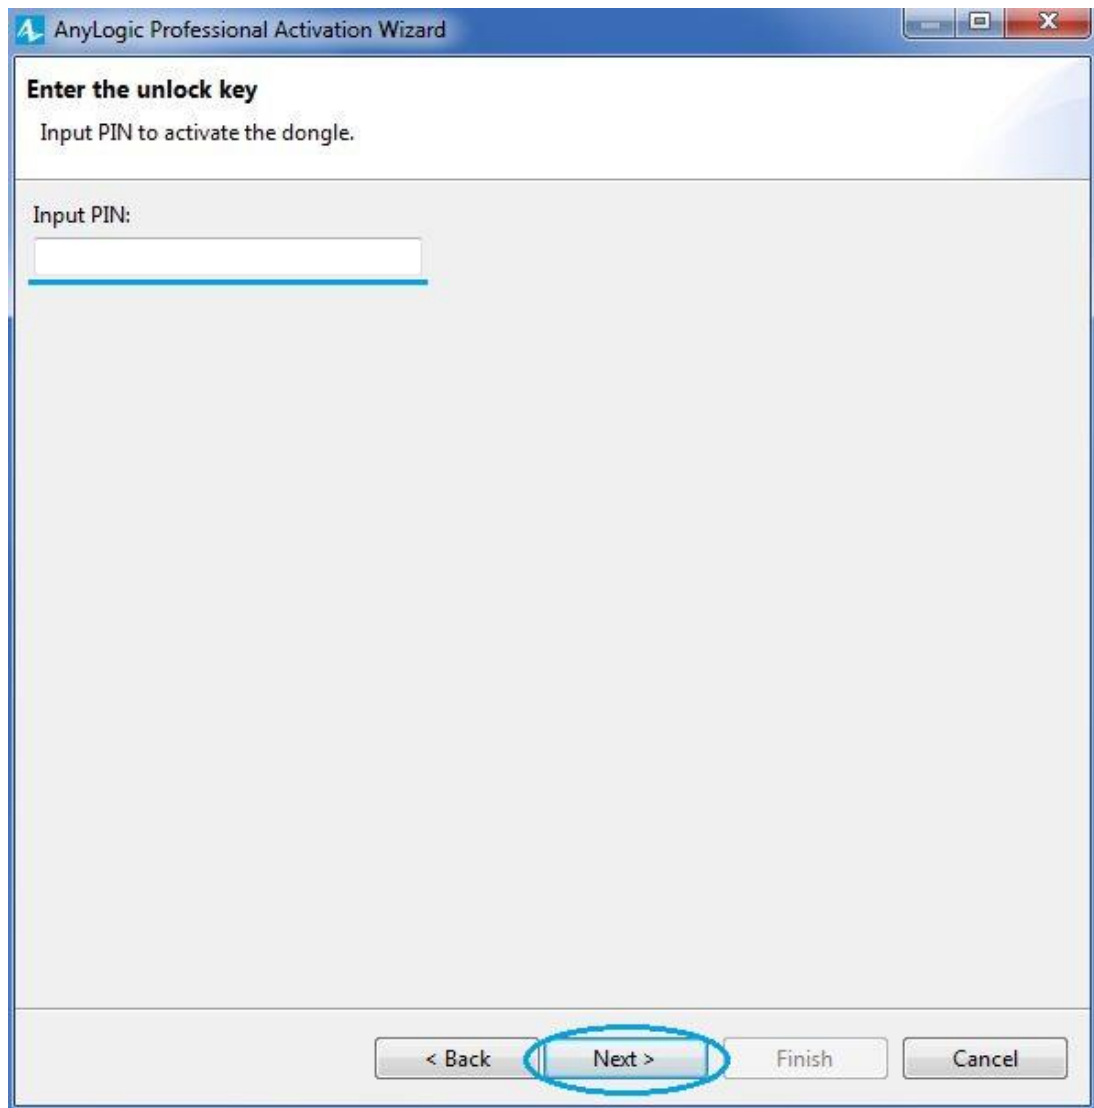

Thank you for choosing AnyLogic! Please complete the following steps to download and activate AnyLogic 7:

1. Download AnyLogic 7 Professional distribution set: www.anylogic.com/downloads
2. Install AnyLogic and run it. An activation wizard will show up automatically (to open it again later select "Help | Activate product").
3. Select the option "Use a USB Dongle to activate AnyLogic. Please insert a Dongle before pressing next button".

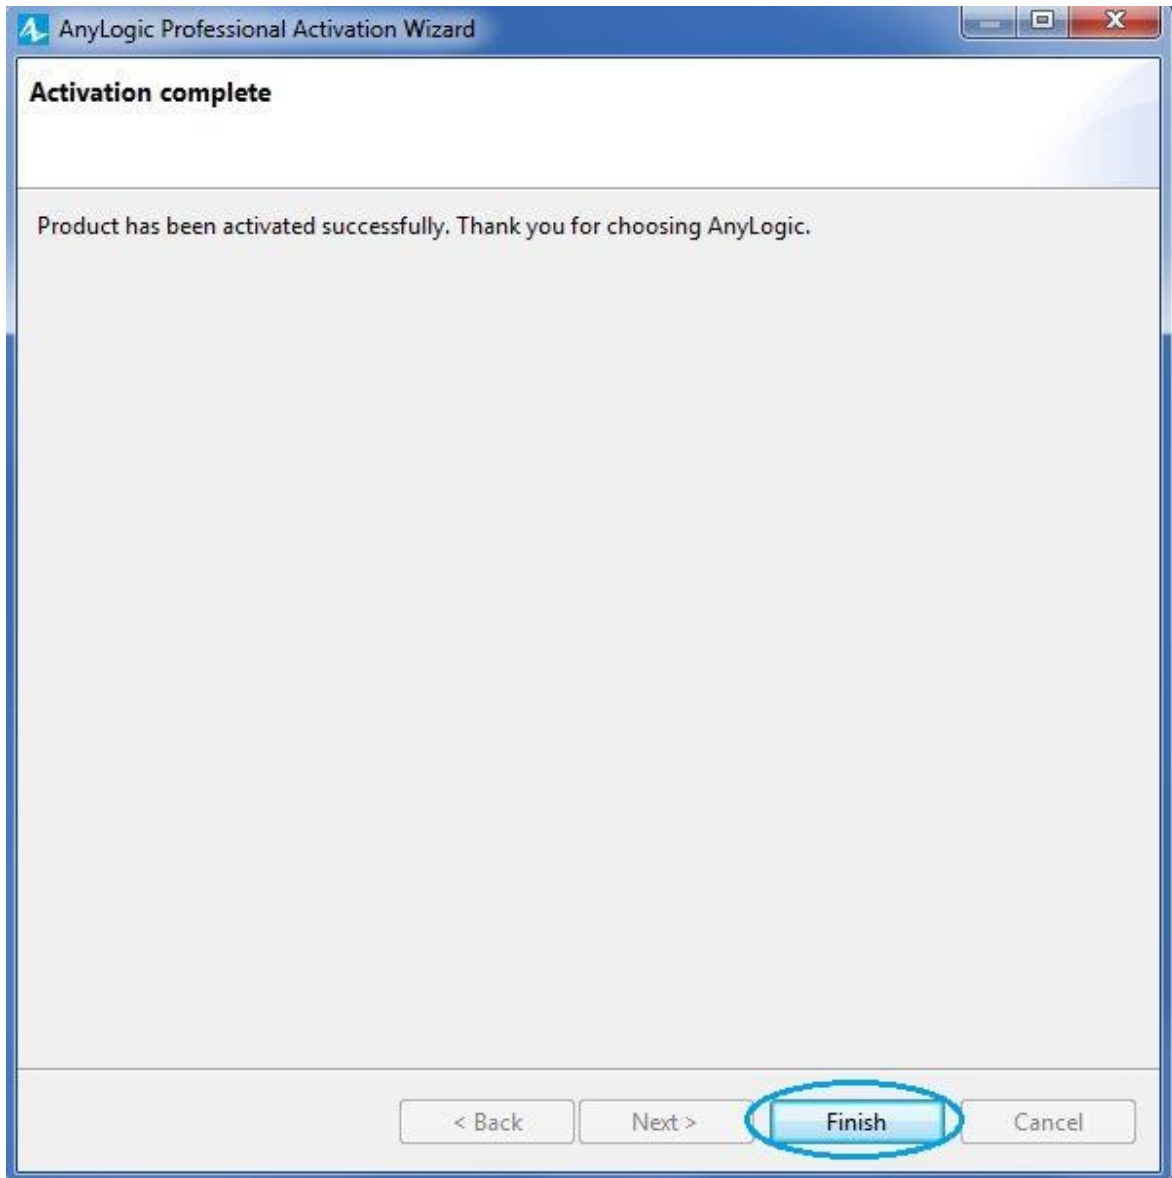

4. If it's the first time dongle is used for activation of AnyLogic, Activation Wizard displays the "dongle activation" dialog. Please, enter a dongle PIN-code provided by your distributor.

NOTE: For the correct work of the USB-key a user should have full administrative rights (the ability to read/write information) at least for the two following folders: C:\Program Files\AnyLogic 7 Professional. and C:\Users\user name\.AnyLogicProfessional. This is important because AnyLogic communicates with the dongle and writes the details into these folders.

NOTE: Dongle has to be activated just once. When first activation is completed, AnyLogic won't require dongle PIN-code neither on this machine nor on others pc's.

5. AnyLogic has been successfully activated.

If you have any questions or concerns, please, contact us at support@anylogic.com

Sincerely yours,
The AnyLogic Company
