

AnyLogic dongle update instructions

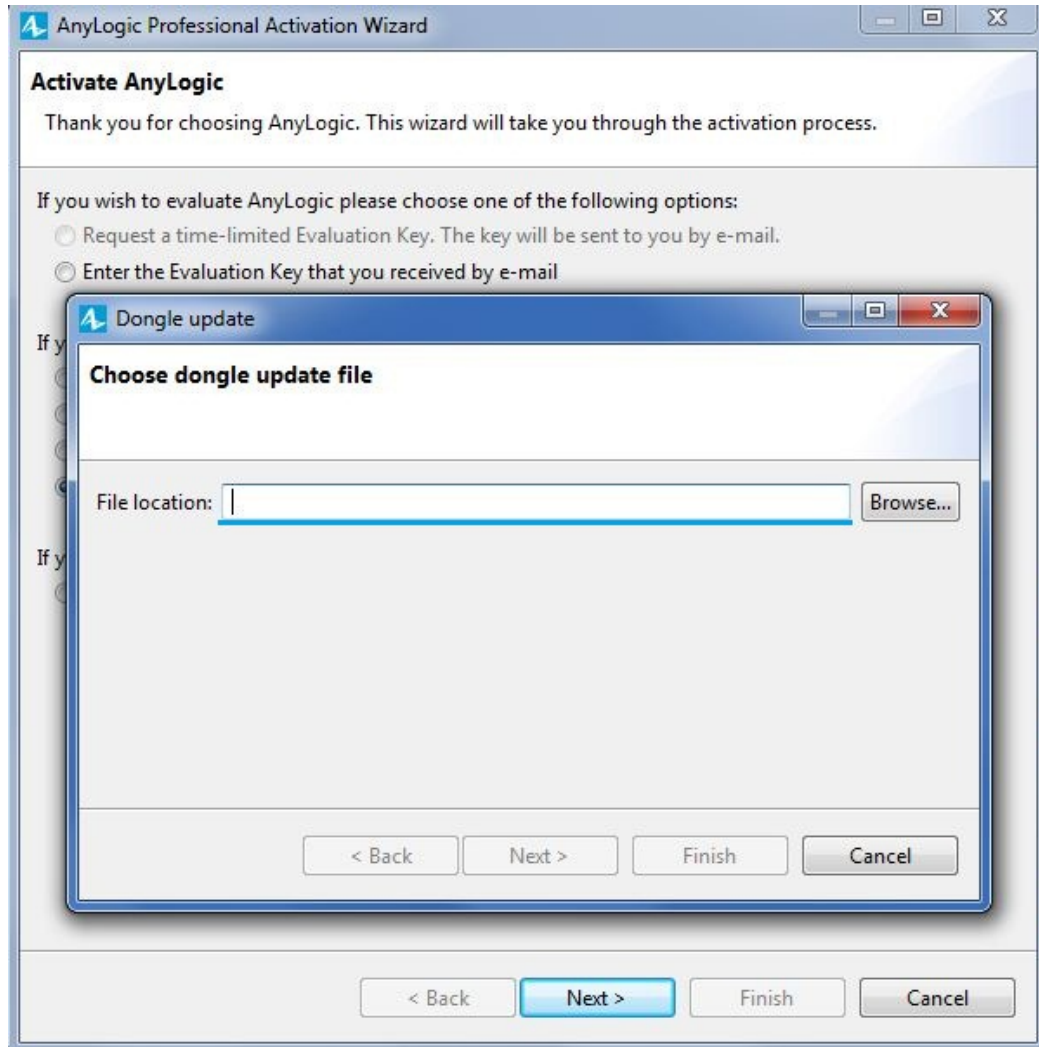

Dear Customer,

Thank you for choosing AnyLogic! Please complete the following steps to update AnyLogic dongle:

1. Having received support purchase confirmation letter from our Team, please save the attached Id.file(s) to a folder on your hard drive. The name of the file corresponds with the number of the dongle.
2. Download the latest version of AnyLogic from: anylogic.com/downloads
3. Run AnyLogic. The activation wizard will show up automatically, please choose the option "Update the firmware of your USB-dongle". In case you already have the latest version of AnyLogic, please go to the "Help | Dongle update..." menu.

4. On the "Dongle update" page please specify the location of the Id.file and click the "Next" button.
5. Insert the dongle into the USB slot of your PC or laptop, select the option "Update a firmware of your USB Dongle" and click the "Next" button.

6. The license information will be renewed automatically.

If you have any questions or concerns, please contact us at support@anylogic.com

Sincerely yours,
The AnyLogic Company
