

Updating the license information on the AnyLogic Server USB-dongle

Dear Customer,

Thank you for choosing AnyLogic! Please complete the following steps to update the Server dongle:

1. Having received support purchase confirmation letter from our Team, please save the attached Id.file(s) to a folder on your hard drive. The name of the files corresponds with the number of the dongle.
2. Please open Server Console in the web browser.

server details

service is running

License Owner:

Company/Organization:

XJ

Department:

License Type:

AnyLogic Professional (Options: OptQuest) for 6 computer(s)

Support end date:

Sat May 14 00:00:00 MSD 2016

Software:

TeamLicenseServer/1.0

License lease period (weeks): 6

usage information

1 of 6 licenses are in use

Please login to change license parameters

Login: Password:

3. Please log in as administrator. Go to the update dongle section in the bottom of the console and choose the update file using the **Choose...** button.
4. Upload the selected Id.file onto the server by clicking the **Upload...** button. Please note that both of the Id.files should be uploaded as they update the license information and the license support end date on the server.

Please note that renewing the information on the server does not affect computers of the end users.

-TO RENEW THE MAINTENANCE AND SUPPORT SERVICES ON THE TARGET COMPUTER

1. Please drop the leased license.
2. Lease the license from the AnyLogic Team License Server again. New license will have renewed Maintenance and Support Service License.

If you have any questions or concerns, please contact us at support@anylogic.com

Sincerely yours,
The AnyLogic Company
