2

So, where are we today – September 2026?

Done! 100% Complete. Ready for you!

Please meet AnyLogic Online >>>>

Before we continue:

Thank you, AnyLogic Team!

- It's been a major six-plus-year effort.
- We had to almost double the size of our company.
 - And we did it.
- (*with zero slowdown in the desktop product development!)

What happens now?

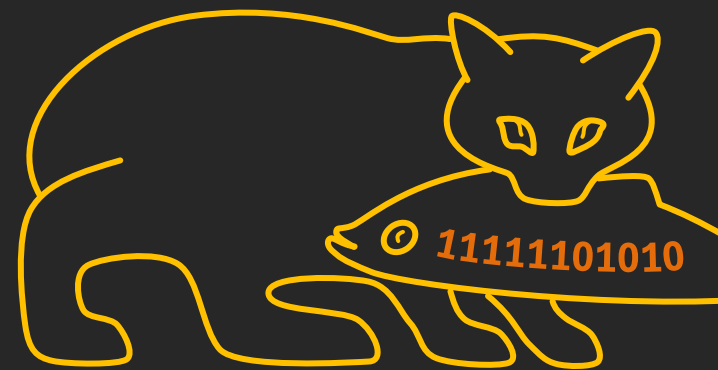

We want your feedback!

- AnyLogic Online is **available for free to everyone** as a Personal Learning Edition* (PLE)
 - * same terms and restrictions apply.
- If you want to familiarize yourself with AnyLogic, you now have a choice:
 - Download AnyLogic PLE Desktop, or
 - Open the model editor directly in your browser – integrated with the execution environment
- AnyLogic Online and AnyLogic Desktop are fully compatible
 - Switch between them anytime
- We very much welcome **universities** to **teach simulation using AnyLogic Online!**

What's next?

- **Early 2027:** AnyLogic Online will become commercially available as **SaaS**
- AnyLogic Online and AnyLogic Private Cloud will merge into a single web application “**AnyLogic**”
- AnyLogic web app will be available for **on-premises installation** as a subscription offering
- The **desktop product** will continue to develop and stay in 100% sync with AnyLogic Online

Thank you!

KEEP YOUR BRAIN IN SHAPE
