Revised Section 508 Report

Notes:

Chapter 3: Functional Performance Criteria (FPC)

Notes:

Criteria	Conformance Level	Remarks and Explanations
302.1 Without Vision	Partially Supports	Menus, dialogs, the code editor, and the Projects tree may be used with keyboard and assistive technology, but graphical model diagrams, charts, and animations may require vision.
302.2 With Limited Vision	Partially Supports	AnyLogic supports text resizing and operatingsystem high-contrast settings, but some graphical editor controls, diagrams, and dense views may remain difficult for users with limited vision.
302.3 Without Perception of Color	Supports	Color is not the only means used to convey information; textual names, labels, icons, structure, and error descriptions provide additional cues.
302.4 Without Hearing	Supports	The desktop model editor does not require hearing, and essential information is presented visually or as text.
302.5 With Limited Hearing	Supports	The desktop model editor does not rely on hearing for essential operation and provides visual or textual information.
302.6 Without Speech	Supports	Speech is not required for input, control, or operation of the desktop model editor.

Criteria	Conformance Level	Remarks and Explanations
302.7 With Limited Manipulation	Partially Supports	Many functions are keyboard operable, but creating, connecting, positioning, resizing, or editing graphical model elements may require pointer precision or dragging.
302.8 With Limited Reach and Strength	Supports	The software operates through standard computer input devices and does not itself require elevated physical reach or strength.
302.9 With Limited Language, Cognitive, and Learning Abilities	Partially Supports	Consistent navigation, labels, contextual help, and textual error messages assist users, but simulation modeling and portions of the interface remain technically complex.
