## THE ONLY MULTIMETHOD MODELING ENVIRONMENT

Our flagship product, AnyLogic Software is the standard in multimethod dynamic simulation modeling technology, delivering increased efficiency and less risk when tackling complex business challenges from a single platform. No matter how complex your system is, you will always find the right tools in AnyLogic to make your model elegant, natural, and manageable. Simulate any system or process related to business or research, from manufacturing and logistics, to marketing campaigns or social changes in a visual drag-and-drop environment.

### Capabilities/Core Competencies

- Most comprehensive simulation platform – no "work-arounds" to solve business problems
- Interoperability – connect with virtually any system, programs or database
- Scalability – no limitation on model complexity and size
- Easy deployment – export and share your models locally or in the cloud
- Extensible – represent complex and unique environments beyond out-of-the box functionality

### Develop models using all three modern simulation methods

- Discrete Event
- Agent Based
- System Dynamics

### Past Performance

**US Army:** Supply Chain of Munitions  
**Lockheed Martin:** Aircraft Fleet Maintenance  
**US Dept. of State:** MRO/Materials Planning
